

We currently have another TA going through the NPECTS course. The training is being funded by the P.E. and sports premium money as we believe it will add depth to the P.E. department at both schools and mean that our commitment to high quality P.E. is sustainable even if our staffing situation changes. We also believe that this added depth will mean that we will be able to add to our already wide variety of extra-curricular activities. It also means that any sick leave at either school can be covered by the additionally trained T.A.

Our P.E. Co-ordinator is also attending a level 4 Subject Leader course to compliment her NPECTS course, Level 3 Physical Development in Early Years and Level 3 Subject Leader qualifications.

Our commitment to the increasing the children's activity levels have also meant that we have invested in training for our MSA's and we have employed a play leader so children can have a safe but active experience at playtime. We have also purchased a variety of resources to be used by the children at play time and lunch time and increased the storage for the new equipment. Equipment has also been purchased to support the 4 lunch time clubs currently being run by our P.E. Co-ordinator.

The money is being spent on new resources for the reception classes, where Physical Development is embedded throughout the curriculum and children will have access to it everyday.

We are also continuing our scheme of 'Take Home Bags' where children can take home some pieces of equipment and use them at home to practice skills or to do activities they may not otherwise be able to do. This scheme works like a P.E. library and the equipment is expected to be returned.

The funding also supports our 'Challenge Cards Scheme' where children who are close to mastering a particular skill is challenged to practice it at home and given a medal if they do so. Children are loaned any equipment needed for this.

Our target is for every child to have the opportunity to be physically active for 1 hour a day. To achieve this we run a before school club, lunch time activities including a range of clubs lead by a specialised teacher and a selection of after school clubs including football, Capoeira, Dance

Gymnastics etc, these will be supported with the funding with new equipment and an additional Capoeira slot is available to all children in Curriculum time on a class by class rota. It is also hoped with the newly trained staff we may be able to offer an OAA activity on a class by class rota.

All of the above has meant that our school has continued to offer the children in Key Stage 1 two ours of curriculum time P.E. and more opportunities to be physically active than ever. Evidence of our commitment to P.E. and the impact of the money is everywhere. On average 65% of our children do an extra-curricular club through the school and attainment and progression in P.E. is as high as it's ever been. EAL and FSM children are now showing the greatest improvements thanks to the changes which have been made. The future looks bright too as we are committed to sustaining this high quality and the children's love for physical activity.

The use of the money for the academic year 2014/2015 is as follows:

- New Equipment- £2,700 (approx)
- Staff Training- £1,700 (approx)
- EYFS equipment-£880 (approx)
- Storage shed and Larger playground Equipment - £1,600 (approx)
- Coaches/Specialised Teachers- £2,000 (approx)
- Events- £300 (approx.)
