

School Closure- Home Learning Expectations

Reception

We have put together a mix of **online** and '**non-screen**' activities covering all areas of the curriculum for your child to complete while school is closed. Children can complete the work alone or with the support of mums, dads and carers.

Record the work you do, and the time spent online in the book provided. When we re-open, children can bring this book back into school so we can celebrate the work they have done and plan their next steps of learning.

If you have any questions about the work, **please contact your child's year group leader** on the email address below. **We would also love it if you could email us some examples of your child's work so that we can praise them!**

With families being asked to socially distance themselves, our children may be having have extended access to technology to help them entertain themselves. To help children enjoy online resources safely, online safety information can be found on our website under 'Keeping Your Child Safe' and then 'Online Safety' section.

Thank you in advance for your support. We will try and limit the impact on our children's education as much as we possibly can. If needed, we will post further work on our website after Easter.

Suggested timetable

We suggest trying one literacy and maths activity every day alongside a creative/understanding the world/physical activity.
You should read together every day.

School contacts:

Mrs Pereira - EYFS Lead
