Friday 10th January Antelopes and Bears

Happy New Year!

In maths this week we have been learning about Capacity. We have been using the words "empty, nearly empty, full, nearly full and half full" to talk about the amount of liquid in our containers.

In Science we have been learning about Forces. We have started to learn about "pushes" and "pulls". We have made boats and predicted what we think will happen if the boat gets a big push or a little push. We tested our ideas.

At Home - Talk about push and pull. Eg) In the bath, can you push the boat? How far did it go? What if you push it harder? What do you think will happen?

Talk about full, empty etc. Eg) If you have a drink, is it full? What if you drink it all? In the bath you can fill and empty bottles. Can you make it half full? Can you make it nearly empty?

Waterloo Park

As part of our learning for Science and DT next week we will be going to visit Waterloo Park.

Please make sure the children have sensible shoes and warm coats every day.
